Market Analysis Core

Competency – Standard 5

- Each Department of Insurance shall have a system for recording and tracking complaints in a database using a coding system to facilitate analysis and trending.
 - ✓ The Department of Insurance has a procedure in place to monitor the accuracy of complaint data.

Complaint Reconciliation Process

The “Olden Days”: Paper Reconciliation

- Staff-intensive process for both the Division and the companies
 - Due to workload and staffing issues, the Division was unable to publish complaint ratio reports in 2002 and 2003
- Performed twice a year
 - Paper reports listing the closed complaints were mailed to companies for review
 - Companies returned information regarding problem issues for the Division staff to review
- Higher costs were associated with the paper reconciliation process
- Not a “green” process

Current Process: 2004 and Beyond

- The Division developed an on-line, real-time web-based application in 2004
- Certain data elements from each consumer-based complaint are retrieved from our complaint database
- These elements are displayed on-line for the company to review

Current Process

(continued)

- Company can access data for closed complaints at any time throughout the current calendar year
- Annual deadline for company review is January 30 for the prior calendar year's complaint data to permit the calculation of indices
- The Division publishes the complaint ratios and complaint indices annually on our website (www.dora.state.co.us/insurance)

Current Process

(continued)

- If the company agrees, the complaint is moved to a list of “reviewed” complaints on the company’s reconciliation webpage
- If the company disagrees, the reviewer marks “disagree” and puts the reason in the free text block to explain
 - Examples: incorrect company, no record of complaint, wrong product line
 - Company cannot “disagree” about the validity of the complaint

Current Process

(continued)

- Division staff review the “disagrees”
 - If appropriate, we change the information in our complaint database
 - We retain authority to determine whether the disagreement is valid and whether the information should be changed
 - If any data is changed, the complaint will be available for the company to review again
 - If not, the assigned analyst will contact the company’s reviewer to explain why

Data Elements

- Division's assigned complaint number
- The "incident" date (if applicable)
- Date the Division "opened" its complaint investigation
- Date the Division "closed" its complaint investigation
 - This is not the date of the company's response to the Division's request for information
- Complainant's name
- Short description of the product line
 - Auto (Private Passenger, Motorcycle, Motorhome, etc.)
 - Accident & Health (Individual or Group)
 - Homeowners (Condo/Townhome, Renters/Tenants, etc.)
 - Life (Annuities, Individual, Group)

Data Elements not Provided

The following data elements are not provided for review:

- Complaint “reason” codes
- Complaint “disposition” codes
- “Confirmed” or “non-confirmed” status of complaint
